

EXPLORER XL

PURE WATER FOR
LARGE VESSELS

FROM 3,600 TO 6,200 GPD (13,500-23,500 LPD) OF PURE WATER

The Blue Water Explorer XL series of watermakers offers semi-automatic operation in a wide range of capacities to fit the needs of large yachts, small cruise ships, and commercial vessels. The open vertical frame increases access for service while minimizing its equipment space footprint. The standard fresh water flush feature increases membrane life, while the optional media filter can extend service intervals between filter changes. This robust system is built for reliability, making it an excellent choice for vessels that require consistent, high-quality water production. Its advanced design ensures long-term performance with minimal upkeep.
